What is Bowling for Rhinos?

Each year the American Association of Zoo Keepers (AAZK) sponsors a fund raising bowl-a-thon called "Bowling for Rhinos" (BFR). Over 60 AAZK chapters participate throughout the US and Canada, raising over \$450,000 annually.

BFR funds support Lewa Wildlife Conservancy in Kenya, Ujung Kulon National Park in Java, Indonesia, Bukit Barisan Selatan National Park, Way Kambas in Sumatra and Action for Cheetahs. These sanctuaries not only save rhinos, they save these entire ecosystems!

When is BFR?

August 15, 2016

Why protect rhinos?

The main threat to rhinos is poaching for the international rhino horn trade.

All 5 species are in peril!

Rhinos are a keystone species, their removal results in drastic changes in the structure of the ecosystem. They dig for water and roots with their horns, exposing food for smaller animals and disrupting soil allowing for easier seed germination. Their dung fertilizes the land and helps spread seeds. The four species of browsers keep shrubs and bushes in check by pruning them.

How does BFR help rhinos?

We save large expanses of habitat. Saving these habitats helps protect not only rhinos but also hundreds of animals including Asian and African Elephant, Cheetah, Somali Ostrich, Grevy's Zebra, Rhinoceros Hornbill, Clouded Leopard, Hawksbill Turtle, Sumatran Tiger, many others species and even Coral Reefs.

100% of proceeds go directly toward *in situ* conservation projects, conserving rhinos, their habitats, and hundreds of other endangered plants and animals!
